Career Overview

➢ **Front End Developer** **July 2023 – Present**

Acabes International Pvt Limited- Kochi, India

Acabes International is a FinTech that provides software development, support and services to businesses across Arab Bank and its Affiliates and subsidiaries globally.

- Designed and developed user interfaces for multiple miniApps.
- Expertise in creating adaptive and responsive designs that ensure optimal user experience across various devices and screen sizes.
- Designed, developed, and integrated payment-related miniApps, enhancing transaction processes and user experience.
- Opportunity to contribute to the implementation of services, driving effective integration and enhancing overall functionality.

Awards And Achievements

- Got Certificate of appreciation from Deputy CEO of Arab Bank

University Projects

- **Mini Project – Bus Tracking System** - *Python, Java, XML, firebase*

  - Developed project to address lack of real-time bus information for passengers, aiming to enhance public transport efficiency by providing real-time bus location and estimated arrival time.
  - Implemented system using Android for mobile application development, Python for simulator creation, and Java/XML for backend development, leveraging Firebase for data management and synchronization.

- **Main Project – Voting System Using Blockchain -** *Python, HTML, CSS, Java, XML, MySQL, Ganache*

  - Addressed the need for a more transparent and secure voting system. Tackled challenges of mistrust in traditional voting methods.
  - Implemented a decentralized blockchain-based voting system. Utilized cryptographic hash functions to ensure data integrity and immutability. Voters interacted with the system through a decentralized application for registration, verification, and casting votes. Prevented voter fraud through unique digital identities linked to each vote, ensuring only eligible voters participate.
