Experience

Software Engineer — **09/2021 to 11/2023**
Espire Infolabs — **Gurgaon, India**

Projects

- **NHS 24: Health and Care Services**
  Delivered digital health and care services in Scotland.
  - Developed responsive design principles, ensuring seamless accessibility across devices, leading to a 20% increase in user engagement.
  - Optimized cross-browser compatibility by identifying and resolving UI inconsistencies across multiple browsers.
  - Implemented caching strategies to improve system performance and efficiently handle high traffic loads.
- **Hydropool: E-commerce Application**
  A commercial swimming pool company
  - Managed the end-to-end development of Sitecore websites, including content creation, template development, and integration with external systems.
  - Devised and applied SEO strategies, resulting in a 30% rise in organic traffic.
  - Actively participated in agile development sprints, collaborating with cross-functional teams, and consistently delivering high-quality features on schedule.
  - Managed release processes, ensuring smooth deployments and minimizing potential service disruptions.
- **Ceva Logistics: Courier Services**
  - Designed and engineered robust business rules, UI policies, and client scripts, enhancing data accuracy and significantly improving user interaction across the platform.
  - Optimized website content, including meta tags, headings, and alt tags, to improve search engine rankings.
  - Collaborated with UX/UI designers to iterate on designs, provide input on user interactions, and implement visual elements.
  - Enhanced website performance by reducing load time by 400ms through Lazy Loading.

Training — **02/2021 to 07/2021**
J-spider – Web Development — **Bengaluru, India**

- Completed a comprehensive web development training program covering HTML, CSS, JavaScript, and Frameworks like ReactJs and NextJs.

Personal Projects

- **TimberLoop: Online Shopping Application** — **Project Link**
  An online shopping e-commerce application achieved through the integration of robust technological implementations.
  - Developed a full-stack e-commerce application with secure user authentication and authorization using JWT (JSON Web Tokens).
  - Integrated JWT authentication to enhance security for login, registration, and protected routes.
  - Crafted with meticulous attention to detail, our application boasts a clean, intuitive user interface that ensures a seamless shopping experience. Implemented Infinite scroll increased user attention by 40%.
  - Capability to dynamically manage user carts, wish lists, and orders, providing an intuitive shopping experience.
  - Offers a comprehensive suite of functionalities, enabling users to effortlessly explore a diverse range of products, create personalized wish lists, curate a virtual shopping cart, and seamlessly finalize their purchases.
  - Optimized search functionality by applying debouncing, reducing API calls, and enhancing user experience.

Technical Skills and Interests
