Summary

Detail-oriented and highly skilled React.js Developer with 2+ years of experience at Infosys. Proficient in building and optimizing user-focused web applications using React.js. Converting client requirements into functional applications, implementing user interface components, and collaborating with cross-functional teams to deliver high-quality software solutions. Strong foundation in JavaScript, HTML5, CSS3, and modern front-end development practices.

Technical Skills

- **Programming Languages:** JavaScript (ES6+), HTML5, CSS3, JSON
- **Frameworks & Libraries:** React js ,redux ,react query, tailwind css ,framer motion
- **Tools & Platforms:** Git , npm , webpack , Babel ,JIRA
- **Others:** RESTful APIs, AJAX, Responsive Web Design, Agile/Scrum methodologies
- **Version Control:** Git, GitHub, Bitbucket.

Work Experience

Infosys **React.js Developer**
April 2022 – Present

- Developed and maintained responsive web applications using React.js, ensuring optimal performance across various devices and browsers.
- Implemented reusable components and front-end libraries to streamline development processes and improve code maintainability.
- Collaborated with UI/UX designers to translate design mockups into high-quality, interactive user interfaces.
- Utilized Redux for state management, enhancing the scalability and efficiency of applications.
- Participated in code reviews, providing constructive feedback to peers and ensuring adherence to coding standards and best practices.
- Worked closely with back-end developers to integrate RESTful APIs, enabling seamless data exchange between client and server.
- Conducted thorough testing and debugging to identify and resolve performance issues, ensuring a smooth user experience.
- Contributed to the documentation of project requirements, technical specifications, and user manuals.

Alpha Cloud Technologies **Junior Web Developer**
October 2021 – March 2022

- Developed and implemented user-facing features using React, ensuring an engaging and intuitive user experience.
- Optimized 50+ components for maximum performance, resulting in improved application efficiency and reduced load times.
- Integrated Redux for state management and TypeScript for type safety, enhancing code quality and maintainability.
- Converted design prototypes into interactive and responsive web pages, ensuring seamless integration with constructed APIs.
- Collaborated closely with the web development team, including project managers, developers, and QA, to identify and resolve issues, develop testing methods, and establish best practices and tools.

Personal Projects

Safarica

Technologies Used: React, Tailwind CSS, Framer Motion

- Developed a dynamic and interactive web application using React, ensuring efficient and seamless user experiences.
- Utilized Tailwind CSS to design and implement responsive, mobile-first user interfaces with a focus on modern, clean aesthetics.
- Integrated Framer Motion to add advanced animations and transitions, enhancing the visual appeal and interactivity of the application.
- Implemented state management and optimized component performance to ensure a fast, responsive application.
- Collaborated with team members to define project requirements, design prototypes, and execute development tasks.
- Conducted thorough testing and debugging to ensure high-quality, bug-free releases.

Messenger Application

Technologies Used: React, Tailwind CSS, Google Authentication, Socket.io

- Developed a real-time messaging application using React, providing users with seamless and instant communication.
- Implemented responsive and visually appealing user interfaces with Tailwind CSS, ensuring a consistent user experience across various devices.
- Integrated Google Authentication for secure and easy user login, enhancing the security and usability of the application.
- Utilized Socket.io to enable real-time, bi-directional communication between users, ensuring messages are delivered instantly.
- Collaborated with the development team to define project requirements, design features, and troubleshoot issues.
- Conducted extensive testing to ensure robust performance and a bug-free user experience.

Education

- Bachelor of Engineering (ECE) — July 2016 – June 2020
  Vel Tech Engineering College, Chennai

Core Competencies

- **Front-End Development:** Proficient in developing dynamic and responsive web applications using React, Tailwind CSS, and JavaScript (ES6+).
- **State Management:** Experienced in implementing state management solutions with Redux to enhance application performance and maintainability.
- **UI/UX Design:** Skilled in converting design prototypes into interactive and user-friendly web pages, ensuring an engaging user experience.
- **Performance Optimization:** Proven ability to optimize components for maximum performance and efficiency.
- **Real-Time Communication:** Expertise in integrating Socket.io for real-time, bi-directional communication in web applications.
- **Authentication:** Knowledgeable in implementing secure user authentication methods, including Google Authentication
- **Version Control:** Experienced in using Git and GitHub for version control and collaborative development.
