Education

Techno India University
Bachelor of computer application (H)

Experience

(FRONTEND DEVELOPER)

Aleef web solutions Dec 2023 – Present

- Refactored Homepage code to follow new design
- Migrated Redux to Redux Toolkit Architecture
- Refactored code architecture and component
- Optimized code to reduce load times by implementing lazy loading, avoiding unnecessary re-render (memoization), code splitting.

Connect-2-learn Apr 2023 – Oct 2023

- Worked as frontend dev for various *companies including Visa & Agora.*
- Worked on migration vanilla js code to react.js
- Contributed 50K+ lines of code to an established codebase via Git
- Worked on various projects including banking, ecommerce.

Projects

Fast React Pizza App | *React, redux-toolkit, react-router, Git* June 2023

- Utilized Advanced routing and state management with redux-toolkit.
- Handling form submitting and redirecting the current state immediately.
- Used Api for fetch data showing loading state, error state, and ready state.

The Wild Oasis site | *React, Next.js, Auth.js, Supabase, hooks, Git* May 2024

- Build by next.js v14 with implementation of all the features provided by next.js.
- Implemented App routes (dynamic routes) with loading error and layout page.
- Implemented Auth.js for authentication by the google provider.
