SEGHU LAKSHMI DEEPTHI **deepthisegu2@gmail.com**
+91 - 8688757948

Objective:

To procure proficiency in Domain knowledge and Real World Experience, indispensable for Software Professional to accomplish a phenomenal, challenging position and to lead a pivotal role in facing the challenges posed by the industry.

Summary:

- Building responsive and visually appealing user interfaces using React.js, HTML, CSS, and related libraries.
- Strong understanding of NPM and modular application development skills building.
- Ensuring cross-browser compatibility and optimizing applications for performance..
- Implementing state management using tools like React Context, Redux, etc., as needed.
- Integrating with backend APIs and services to fetch and update data.
- Handling asynchronous operations using promises, async/await, or middleware.
- Implementing code-splitting, lazy loading, and other optimization techniques.
- Ability to work under pressure and meet deadlines.
- Knowledge of software development, basic testing, and agile development methodology

Academic profile:

- Graduated from **Kakinada Institute of Engineering and Technology For Womens** with an aggregate of 7.8 in ELECTRONICS AND COMMUNICATIONS ENGINEERING(ECE) department by academic years(2018-2022).

Technical Skills:

Technologies	**:** HTML, CSS , JAVASCRIPT, REACT JS, NPM
Tools	**:** VS Code,Postman API,
Version Control	: GitHub ,Bit-Bucket
API Protocols	: Rest Api's

Professional Experience:

- Working as **ASSOCIATE SOFTWARE DEVELOPER** at **VEDAS LABS PRIVATE LTD** from August 2022 to till now.

Project Details:

Project 1:

Title : S.L.R.S.A.

Client : SIERRA LEONE ROAD SAFETY AUTHORITY

Available Platform : Web Application

Website Url : https://slrsa.com

Role in the project : Frontend Developer

Description:

SLRSA is a **Sierra Leone Road Safety Authority** (SLRSA) web application which provides features like renewal of existing driving and vehicle license in **SIERRA LEONE**. By using this application users can apply for new driving license and vehicle license as well. Once the users submitted the application. They can receive the **Application Reference Number** through mail and mobile number.

After receiving the reference number users can complete the payments through Smart Pay integration. Then the admin management will check and each application to proceed further steps.

Responsibilities:

- Gather and refine specifications and requirements based on technical needs .
- Involved in requirement gathering, system design, coding, testing, implementation and post implementation support.
- Create and maintain software documentation .
- Implementing security measures such as input validation, authentication, and authorization to protect against common web vulnerabilities.
- Using version control systems (GITHUB) to manage code base, collaborate with team members, and track changes.
- Creating interactive and user-friendly web interfaces using React.js components and UI libraries.
- Implementing client-side routing and navigation using libraries like React Router to create seamless user experiences.

Project 2:

Title : S M A R T I N S U R E

Client : SMART SYSTEMS

Available Platforms : Web application

Website Url : https://smartinsuresl.com/

Role in the Project **:** Frontend Developer

Description:

S M A R T I N S U R E is a web application which provides features like renewal of existing insurances in **SIERRA LEONE** . By using this application users can apply for new insurance as well. Once the users submitted the application. They can receive the **Application Reference Number** through mail and mobile number.

After receiving the reference number users can complete the payments through Smart Pay integration. Then the admin management will check and each application to proceed further steps.

Responsibilities

- Understanding & review the system requirements which was given by client.
- Involved in requirement gathering, system design, coding, testing, implementation and post implementation support.
- Create and maintain software documentation .
- Implementing security measures such as input validation, authentication, and authorization to protect against common web vulnerabilities.
- Using version control systems (GITHUB) to manage code base, collaborate with team members, and track changes.
- Creating interactive and user-friendly web interfaces using React.js components and UI libraries.
- Implementing client-side routing and navigation using libraries like React Router to create seamless user experiences.
- Responsible for handling REST API's and integrating in the client-side.
