EDUCATION

Uttarakhand Technical University, Dehradun
Bachelor of Technology in Computer Science & Engineering (GPA: 8.3) *Aug 2019 – July 2023*

EXPERIENCE

Software Engineer Oct *2023 – Present*
Valiance Solutions *Noida*

- **Knowledge Miner (GenAI Helpdesk) | React, Redux, Tailwind CSS, Python, Django, SQL, Google Cloud Run, Google App Engine, CI/CD**
  - Spearheaded the development of an AI-driven Help Desk Chatbot Web Application utilizing **React** and **Tailwind CSS**, enhancing governance efficiency by providing real-time support and access to critical information for government officials at various levels.
  - Implemented robust state management using **React-Redux**, ensuring seamless data flow and interaction within the application, while integrating essential APIs to facilitate real-time support and information retrieval for users.
  - Pioneered **multilingual** and **voice support functionalities**, enabling users to access the chatbot in multiple languages including Hindi, English, and Gujarati, while designing an intuitive Admin dashboard for comprehensive monitoring and analysis of chatbot activities.
  - **Deployment and CI/CD:** Successfully deployed the application to **Google App Engine**, implementing Continuous Integration/Continuous Deployment (CI/CD) for efficient updates and maintenance.

- **Jan Man Survey | React, Tailwind CSS, Google App Engine, CI/CD**
  - Led the development of a survey form using **React**, enabling users to interact with the application through **voice commands**.
  - Ensured the application was fully responsive, providing a seamless experience across various devices.
  - Regularly interacted with clients to gather requirements and provide updates, ensuring the application met their expectations and delivering the project within the decided timeframe.
  - Conducted thorough testing and debugging to ensure a smooth and error-free user interaction.
  - Deployed the application on **Google App Engine** with CI/CD implementation.

- **Gen BI | React, Tailwind CSS, Python, Django, SQL, Google Cloud Run, Google App Engine, CI/CD**
  - Developed the user interface for GenBI, an application allowing users to query datasets using natural language processing (NLP) instead of writing complex SQL queries.
  - Implemented **speech-to-text** functionality, enabling users to interact with the application through voice commands.
  - Collaborated closely with backend developers to integrate frontend features with backend services.
  - Utilized modern frontend technologies and frameworks to create a user-friendly and intuitive experience.
  - Conducted thorough testing and debugging to ensure a smooth and error-free user interaction.

- **Techsagar (Client-DSCI) | Python, Scrapy, AWS, Elasticbeanstalk, Cloudfront, React**
  - Collaborated with a team to successfully complete all project tasks. Worked on the frontend development using React to create a dynamic and responsive user interface.
  - Implemented design and functionality based on project requirements and user feedback. Ensured code quality and maintainability through best practices and thorough testing.
  - Worked on deployment tasks, configuring the development environment on **Elastic Beanstalk** and deploying the production environment on **CloudFront**.

- **Singapore General Hospital (SGH) | Python, Django, Google Cloud Storage, SQL**
  - Developed backend functionalities using **Django**, including schema design tailored to application requirements and implementation of RESTful APIs using Django Rest Framework.
  - Integrated **Google Cloud Storage (GCS)** to store application data and managed corresponding URLs within the database.
  - Collaborated with team members to ensure alignment of backend development with project goals and timelines.

Software Developer Intern *Nov 2022 – Sep 2023*
Valiance Solutions *Noida*

- Implemented a **web data scraping** automation process to efficiently gather and structure online information.
- Developed a Python-based web scraping solution using the **Scrapy framework**, showcasing expertise in data extraction from various web sources.
- Demonstrated the ability to automate data retrieval, saving time and effort when dealing with large volumes of online data.
- Configured Scrapy pipelines to process and store scraped data in MongoDB, ensuring data integrity and consistency.
- Developed deployment scripts to automate the deployment process, pushing data from development to staging and production environments.

Skills

Frontend: React
Backend: Python, Django Rest Framework
Database: SQL, Firestore, Mongodb
Cloud Technologies: AWS [S3, Elastic Beanstalk, Cloudfront, EC2], **GCP** [App Engine, Cloud Storage, Cloud Run],
Tools: Git, GitHub, Bitbucket, Postman

Awards & Certifications

- GCP Cloud Architect - Professional
- AWS Certified Solutions Architect – Associate
- AWS Cloud Practitioner
