Kunj Ladumor

Front-End Developer | ReactJS • React Native • UI/UX • API Integration

Mumbai, Maharashtra | +91 9834298543 | ladumorkunj1601@gmail.com | https://www.github.com/kunjladumor

Summary

Passionate Front-End Developer with 1+ year of experience in building responsive, scalable web and mobile applications using ReactJS, React Native, and Expo. Proficient in creating reusable components and integrating third-party APIs to enhance user experiences. Developed and maintained high-traffic websites and mobile apps, including India Forums and HR attendance systems. Thrive in Agile teams with a strong focus on UI/UX and performance optimization. Skilled in cross-platform development, Context API / Redux for state management, and frontend performance tuning for seamless UX.

Experience

Cyberax Tech Pvt Ltd — **December 2023 - Present**

Junior Software Developer — Mumbai

India Forums (Web Platform)

- Built and maintained the front-end of a high-traffic media platform (India Forums) using ReactJS, HTML5, CSS3, and ES6, supporting over 500K monthly users.
- Developed reusable, modular components using component-driven architecture, improving code maintainability and reducing development time by 25%.
- Optimized site performance and accessibility (Lighthouse score +30%) by implementing lazy loading, code splitting, and semantic HTML.
- Collaborated in Agile teams with designers and backend developers to ship features on tight deadlines.

HR Attendance App (User Mobile App)

- Built a real-time attendance tracking app using React Native and Expo, integrating REST APIs for clock-in/out functionality and live data updates.
- Implemented device push notifications (via Expo), and mobile-responsive UI, improving engagement and user retention.
- Enhanced offline support via local data caching with AsyncStorage and optimized render performance using React.memo and FlatList virtualization.

HR Attendance Admin App (Admin Mobile App)

- Developed an admin dashboard with role-based access control using React Navigation and Context API; integrated live analytics and downloadable reports via CSV export.
- Ensured real-time data synchronization between user and admin apps by implementing centralized state management (using Redux) and optimized REST API handling.
- Enhanced product design through iterative UI/UX testing, improving feature usability score by 25% during QA.

Projects

ProCric8 – Cricket Match Companion App

Built a ReactJS-based cricket match companion app that dynamically displays completed, live, and upcoming matches using context-based routing and live data from a sports API.
Designed dynamic match cards that auto-redirect based on match status and real-time updates, using reusable components and props to ensure maintainable architecture.

Formly – Google Forms Clone

Developed a fully responsive Google Forms clone using ReactJS with a drag-and-drop form builder, real-time preview, and customizable input types, leveraging React DnD and Context API for smooth state transitions.
Engineered UI/UX to closely match Google Forms, focusing on responsive layout and usability to simulate a familiar user experience.

Custom Simditor Plugin

Built a custom Simditor plugin to insert media dynamically using Giphy, Unsplash, and Tenor APIs, integrating asynchronous API calls and rich media embedding directly into the text editor toolbar.

Education

SMT PD Hinduja Trust's IMS — **August 2020 - July 2023**

8.48 CGPA — Bachelor's Degree in Computer Applications

Thomas Baptista Junior College — **June 2018 - March 2020**

78% — HSC

Carmelite Convent English High School — SSC

76.20%

Mumbai University (CDOE) — **August 2023 - Present**

Master's in Computer Applications

Skills

Technical Skills:

JavaScript, HTML5, CSS3, ReactJS, React Native, Expo, Tailwind CSS, Bootstrap, SCSS, Git, Agile

Interests

UI/UX research, developer tools, and API-driven solutions
