Career Abstract:

Experienced Full Stack UI Developer with hands-on backend experience having around 3 years of expertise in designing and integrating dynamic web applications. Hands-on experience in web application software development using React, Angular, NodeJS (Basic) with a strong focus on developing highly interactive solutions. Adept at translating business requirements into technical solutions and delivering high-quality results. Seeking to advance my career with a reputable technology-driven firm where I can leverage my skills and contribute to innovative projects.

Technical Competencies:

Programming Languages	JavaScript, TypeScript.
Frontend Technologies	React, Angular, Redux, HTML, CSS, Jest Unit Testing.
Backend/Database	Basic knowledge of NodeJS, Express, MongoDB, MySQL.
Software/ Tools	VS Code, Devops, SonarQube.
Development Methodologies	Agile/Scrum, Git, GitLab

Work Experience: 2.10 years

- **Yash Technologies –** Pune, India – UI Software developer (Jan 2022 – present)

Project Details:

- **TRAFFIX– Web app (USA based)**
  - **Role** - software developer
  - **Description**: Traffix, a seasoned Logistics specialist in North America, boasts over forty years of experience in the industry. The team at Traffix, powered by cutting-edge proprietary technology, excels in providing a wide array of services. These services span from truckload, flatbed, intermodal, drayage, expedited, and LTL, to specialized government services and managed transportation. Their expertise and technology allow them to optimize their clients' freight spending, offer customized solutions, and swiftly adapt to market fluctuations.
  - **Responsibilities:**
    - Developed and maintained web application using React and Redux, ensuring responsive and dynamic user interfaces.
    - Managed state efficiently with Redux, implementing actions and reducers to handle complex application states and interactions.
    - Integrated RESTful APIs to fetch and manage data, ensuring seamless communication between the front-end and back-end services.
    - Designed and executed unit tests with Jest, ensuring robust and bug-free code through comprehensive test coverage and reliable test cases.
    - Troubleshoot and resolve issues across the stack, from UI bugs to server errors
    - Utilized Azure/Devops Board for tracking project tasks, managing work items, and coordinating with team members to ensure timely delivery of features and bug fixes.

  - **Environment:** React, Redux, JavaScript, TypeScript, Unit Testing, Web API, HTML, CSS.

- **Interview Screening – Web app**
  - **Role:** software developer (worked on web app and web API)
  - **Description:** The Interview screening assessment application is created to automate the complete hiring process in Yash Technologies. Four different roles are created to automate the complete hiring process - ADMIN, TAC, PANEL, and CANDIDATE. This platform streamlines recruitment by enabling seamless coordination and interaction between administrators, technical assessment coordinators, interview panels, and candidates.
  - **Responsibilities:**
    - Designed and developed responsive, user-friendly interfaces using Angular.
    - Develop and integrate RESTful APIs to fetch and display data.
    - Designed and implemented server-side logic and RESTful API endpoints using Node.js and Express.
    - Write and maintained server-side scripts and performed data processing tasks.
    - Developed and maintained seamless data flow between Angular front-end and Node.js back-end.
    - Conducted unit and integration testing to ensure the quality and reliability of the application.
    - Troubleshoot and resolve issues across the stack, from UI bugs to server errors.
  - **Environment:** Angular, NodeJS, Express, JavaScript, Unit Testing, Web API, HTML, CSS.

- **Ethos Energy – Web app (USA Based)**
  - **Role:** software developer (worked on overall development and enhancement)
  - **Description:** As the largest global independent provider of field services, Ethos Energy has extensive experience in servicing multiple gas turbine product lines; aero-derivative, light and heavy industrial gas turbines, components and accessories.
  - **Responsibilities:**
    - Build and maintain reusable, functional, and presentational components using React.
    - Implement and manage the global state of the application using Redux, including creating actions, reducers, and selectors.
    - Ensure proper data flow between components and Redux store, handling actions and state updates efficiently.
    - Implement robust error handling in both React components and Redux actions.
    - Integrate React and Redux with other libraries or APIs as required by the project.
    - Write unit tests for React components and Redux actions/reducers using testing libraries like Jest and React Testing Library.
    - Troubleshoot and resolve issues across the stack, from UI bugs to server errors.
  - **Environment:** React, Redux, JavaScript, TypeScript, Unit Testing, Web API, HTML, CSS.

Educational Qualifications:

- **BSc (Computer Science),** MIT-WPU, 2018 - 2021 (9.42 CGPA)
- **MSc (Computer Science)**, Pune University, 2021 – 2023 (7.68 CGPA)

Personal Details:

- Language known : English, Marathi, Hindi
- Date of birth : 12 January 2001

I hereby declare that the information provided above is true to the best of my knowledge
