TECHNICAL SKILLS

- **Front-End:** React JS, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, SASS, Webpack, Babel, GraphQL, REST APIs
- **Back-End:** ExpressJS, Node.js, API Development, Database Integration
- **Tools & Technologies:** Git/GitHub, NPM, Figma, Qemu, GDB

EDUCATION

B.Tech. in Computer Science and Engineering from Lakireddy BaliReddy College of Engineering, Jun'2018 with CGPA: 8.66

CORE COMPETENCIES

- **User Interface Design**
- **Software Development Life Cycle**
- **Agile Methodologies**
- **Database Management**
- **API Integration**
- **Performance Optimization**
- **Cross-Platform Development**
- **Version Control**
- **Debugging and Troubleshooting**
- **Performance Optimization**

SOFT SKILLS

Problem solving

Conflict resolution

Collaboration

Networking

Time Management

PERSONAL DETAILS

- **Date of Birth**: 12th April 1997
- **Address**: Mylavaram, Andhra Pradesh, 521230
- **Languages known**: English, Telugu

PROFILE SUMMARY

- Working as Software Engineer at Pinscale Technologies, actively involved in the creation of advanced CRM projects while improving user experience through creative design and execution.
- Achieved top-5 ranking in a database design course at IIT Madras among 5,000 participants nationwide, highlighting strong technical aptitude and academic excellence
- Developed an employee dashboard application for Quotient Technology, enabling employees to securely access and manage their information
- Successfully developed a CRM project using React and TypeScript at Pinscale Technologies, implementing design systems and UI components from scratch, contributing to the seamless user experience.
- Engineered a comprehensive design system from inception, incorporating vital UI components like Avatars, Buttons, and Alert Toasts, which greatly enhanced the productivity of the development team.

WORK EXPERIENCE

Pinscale Technologies Private Limited, Hyderabad, May'2022 – Present
Software Engineer
Key Result Areas:

- Establishing CRM features for Floww.ai using React and TypeScript.
- Converting Figma designs into pixel-perfect React components.
- Building and managing application stores, models, and services.
- Creating a design system with components like Avatars, Buttons, and Alerts.

Quotient Technology, Bangalore, Apr'2019 – Jun'2019
Software Engineer
Key Result Areas:

- Designed and implemented an Employee Dashboard for internal use.

INTERNSHIP

IIT Madras, Chennai, May'2017 – Jul'2017
Intern
Key Result Areas:

- Compiled and debugged kernel code with make and GDB, and tested it on Qemu.

IIT Madras, Chennai Oct'2016 – Mar'2017
Took Boss-Mool os & Database Design course
Key Result Area

- Designed databases, developed API calls using PHP, and created UI-rich web pages with HTML, CSS, and JavaScript.
- Achieved a top-5 ranking out of 5,000 participants nationwide.

RESEARCH WORK

Research work, File Link
Worked under professor as a Research Student
Apr'2016 – Feb'2019

- Visualized voltage data on Google Maps and developed interactive web pages with HTML, CSS, and JavaScript.

ACHIEVEMENT

- **2nd Prize in Project Expo.**
