Framework	Django, ASP.NET Core, Bootstrap
UI/UX Tools	Figma (Beginner Level)
Database	SQLite, MySQL, Microsoft SQL Server
Skills:	Wireframing, Prototyping, Responsive design, Accessibility

Soft Skills:

Skills	Team collaboration, Problem-solving, Adaptability, Quick learner

Projects

Online Job Portal

Backend Technologies: Python, Django, SQLite
Frontend Technologies: HTML, CSS

The Job Seeker Module allows job seekers to register by providing details such as name, email, phone number, and qualifications, with secure username and password authentication. Upon registration, the user role is automatically set to "Job Seeker." Job seekers can manage their profiles, including updating personal information, uploading a profile picture, and submitting resumes. They can search for jobs using filters like job title and location, view job listings, and apply by submitting their profile and resume to employers. Additionally, job seekers can track the status of their applications, such as pending, interviewed, or shortlisted.

E-Book Store

Backend Technologies: ASP.NET Core with MYSQL
Frontend Technologies: HTML5, CSS3, JavaScript

Developed an online e-book store using ASP.NET Core MVC with SQL Server as the database. The application features user management (registration, login/logout, profile management), e-book functionalities such as browsing, searching, reading, and listening to audiobooks, and a Readers' Corner for posting articles, blogs, poems, and stories. Integrated PayPal and Stripe APIs for secure payments and implemented responsive design for compatibility across devices. Ensured security through HTTPS, input validation to prevent SQL injection and XSS, and robust authentication and authorization mechanisms.

NGO Management System

Backend Technologies: PHP, MySQL
Frontend Technologies: HTML5, CSS, Bootstrap, JavaScript

Developed a system where admins can manage categories, products, stock, user registrations, verification, orders, and donation records, with functionalities for inserting, updating, and deleting items. Users can register, log in, browse products, add items to their cart, place or cancel orders, and make donations through Razorpay integration. The system simplifies NGO operations by ensuring seamless management of resources and user interactions.
