PROJECT

Health Insurance Model
Platforms: JavaScript, React JS, Redux, MongoDB, Git, Postman.
Roles and Responsibilities:

- Collaborated with cross-functional teams to build and maintain health insurance modules, including plans, claims, and policy management.
- Improved user interfaces for policyholders and administrators with React.js, enhancing usability and accessibility.
- Developed server-side rendered applications using Next.js for better SEO and performance in health insurance modules.
- Integrated third-party APIs to fetch real-time data, such as medical records and premium calculations.
- Optimized MongoDB queries to improve data retrieval for large insurance datasets.
- Actively participated in Agile practices like daily stand-ups, sprint planning, and retrospectives to ensure timely feature delivery.

Key Achievements:

- Reduced claims processing time by 30% through efficient API optimization.
- Successfully launched a new health insurance module under tight deadlines.
