WORK EXPERIENCE

CodeAlpha **Remote**

Web Developer Intern *Mar 2024 - Mar 2024*

- Implemented enhanced CSS techniques and JavaScript frameworks to enhance website interactivity and performance, leading to a 50% reduction in page load time and an increase in overall site speed metrics across browsers and mobile devices.
- Executed a comprehensive performance audit using profiling build tools to identify slow-loading scripts; streamlined code, resulting in a 20% increase in site speed, which contributed to a notable rise in customer satisfaction ratings.
- Launched website features and debugging updates in a live environment, utilizing Git for version control, and ensuring seamless code deployment and stability.

EDUCATION

Sri Arunodaya Degree College (Satavahana University)

B. Com Computer Applications *Graduation Date: May 2023*

PROJECT EXPERIENCE

Food Delivery App - (React, Redux)

- Developed an optimized Food Delivery Website, streamlining operational workflow and reducing manual errors by 20%.
- Reduced missed orders by 30% for a React-based Food Delivery Website by optimizing data flow and implementing efficient state management, improving user experience and order tracking accuracy.
- Designed an interface for an online shopping cart system, boosting transaction completion rates by 15% and ensuring consistent navigation on all devices.
- Improved Order Processing speed by 20% enhancing operational efficiency and Collaborated with cross-functional teams to integrate third-party APIs into existing platforms, expanding functionality across four key areas without increasing load times or negatively impacting site performance metrics.

Todo-App – (React, Bootstrap)

- Engineered a fully responsive to-do application through React, optimizing component styling with Bootstrap; improved user engagement metrics by 40% and Solved average task completion time.
- Introduced custom user interfaces for web pages, enhancing usability and improving user interactions by 35%; led Bootstrap for consistent button and input styling, significantly boosting engagement metrics.
- Simplified the process of adding, deleting, and marking tasks as complete, improving overall task organization.

Expense-Tracker – (HTML, Tailwind CSS, JavaScript)

- Created a web application for expense tracking with HTML, CSS, and JavaScript, enabling 20+ users to manage finances and track income.
- Implemented features like adding, editing, and deleting entries, increasing user functionality by 40% with real-time financial tracking updates.
- Designed a user interface that reduced navigation errors by 25% and boosted user satisfaction scores by 30%.
