SUKANTA DASGUPTA

9883813035 sukantadasgupta17@gmail.com linkedin.com/in/sukantadasgupta/

Technical Skills

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap
State Management: Redux, Context API
Version Control Tools: Git, GitHub
Performance Optimization: Code Splitting, Lazy Loading, Debugging
Soft Skills: Problem Solving, Team Collaboration, Agile Methodology

Experience/Projects

RAJARATHINA DIGITAL SOLUTIONS **2021 – Present**
Frontend Developer *Tamil Nadu, India*

eCommerce Admin Project

- Designed and developed an intuitive **admin dashboard** using React and Redux, enabling seamless management of product listings, order tracking, and inventory updates.
- Integrated the frontend with **RESTful APIs**, ensuring efficient and secure data interaction between the UI and backend systems.
- Implemented **responsive designs** to provide a smooth and consistent user experience across multiple devices, significantly improving usability for admin users.
- Automated key workflows, reducing manual intervention and improving operational efficiency by **20%** through well-structured UI components and optimized state management.

Food Delivery Seller Project

- Built and maintained a **seller-facing platform** for restaurant owners, facilitating real-time management of orders, sales tracking, menu updates, and delivery statuses.
- Optimized the **user interface** for mobile responsiveness, ensuring effortless functionality and accessibility for on-the-go users, leading to a **15% increase in seller adoption**.
- Streamlined key workflows to improve navigation and reduce task completion times, enhancing the overall user experience for restaurant partners.
- Collaborated with cross-functional teams to resolve performance bottlenecks, achieving a **25% improvement in platform load time**.

Personal Projects/Awards & Achievements

April 2020 – Nov 2020

- **E-commerce Website**: Designed and developed a full-featured e-commerce platform using **ReactJS** and **CrudCrud**, offering secure user authentication (login/signup, logout) and personalized cart management. Leveraged **Context API** to implement efficient app-wide state management, resulting in a **30% improvement** in application performance and user experience.
- **Mail Box Client**: Built a mail client application using **ReactJS** and **Redux**, enabling users to send and receive emails securely. Integrated backend support with **CrudCrud**, providing real-time updates for inbox and sent items. Focused on user-specific email storage and retrieval, enhancing data security and operational reliability.
- **Expense Tracker**: Developed a robust expense tracking application with ReactJS, featuring premium options like theme customization for enhanced user experience. Implemented secure data storage using **CrudCrud** and streamlined backend processes, achieving a **25% improvement** in performance. Also optimized authentication methods, ensuring data protection and reliability.
