Rohit Kumar Mishra

Front-End Developer | Angular Developer

Email : rohitmi0012@gmail.com | **LinkedIn** : Rohit Kumar Mishra | **Mobile** : 8318638221

OBJECTIVE

Motivated software engineer and frontend developer with 2 years of experience, eager to contribute my programming skills and enthusiasm to a dynamic team. Committed to continuous learning and growth, with a focus on innovative solutions in collaborative environments.

EDUCATION

Chandigarh University
*Master of Computer Application (**MCA**)*
Currently Pursuing

Microtek College Management and Technology, Varanasi *2018-2021*
*Bachelor of Computer Application (**BCA**)* 61%

Balamiki Inter College *2016-2018*
XII- *Science- PCMIT* 58.0%

SKILLS

- **Programming**: HTML, CSS, JavaScript, NodeJS
- **Frameworks**: Angular, Bootstrap, j Query, Ajax
- **Web Development**: HTML, CSS, JavaScript

Work Experience

Associate Software Engineer -NSTARX **July 2022-May-2024**

- Developing and maintaining full stack web applications using HTML, CSS, JavaScript, jQuery, Angular.
- Designing and implementing new functionality to the existing application and according to the requirement maintaining the application.
- Collaborated closely with design and product teams to implement user friendly interfaces adhering to MVC principles, enhancing maintainability and flexibility. Projects

- ***CMD (credentialmyDoc)***
  - Credential My Doc is a one-stop Medical Staff and Provider Enrollment pre-populated form creation and process management tool. By linking its database with a pdf document function, CredentialMyDoc stores provider information and populates applications and letters on need basis. Once accurate information is entered into the provider profile, documents (that are ready for Provider Signature) may be produced quickly and easily, allowing prompt submission to health plans or credentialing committees. It also helps to manage the credentialing process for Medical Staff and Privileging and enrollment by providing a tracking and task management module to house task assignments and note **using ANGULAR 14**.
- ***Ascp3***
  - Worked in Ascp3 Project,it is an application for Estimation of Patient s based on Insurance Policy selected by the patient with respective Client(Hospital).Worked on basic functionality, Routing **using ANGULAR 14**.
- **OLOBBY**

- Worked in OLOBBY for Korea Client, it is an application which is to provide Single Sign On Feature. Single sign-on (SSO) is a session and user authentication service that permits a user to use one set of login credentials across multiple organization and applications as well (ex:Olobby client Application,chat Application etc.) **using ANGULAR 14**.

EXTRACURRICULAR ACTIVITIES

Problem Solving, Competitive Coding, Cricket
