Career Objective

Graduating in 2024, I am a dedicated and achievement-oriented Computer Science Engineering student with a solid grounding in software engineering principles. I am actively pursuing a challenging position within a dynamic environment, aiming to apply my expertise in **JAVA CORE ,C, PYTHON, JAVASCRIPT, NODEJS(basics), REACTJS, DATA STRUCTURES, MYSQL, GitHub, and more.**

My skill set is enhanced by my creative **problem-solving capabilities and a dedicated commitment to ongoing learning**. I possess adept **problem-solving skills, effective time management, and a strong ability to work collaboratively within a team while maintaining clear and concise communication**. I am enthusiastic about making valuable contributions to an organization's success and growth by strategically applying my technical skills and maintaining an unwavering commitment to excellence.

Education

Bachelor of Engineering (Computer ScienceEngineering)

- **KS Institute of Technology, Bangalore**
- Graduated
- Score: 7.6/10 CGPA

Senior Secondary (12th) - CBSE

- **Fatima Senior Secondary School, Gonda (U.P)**
- Score: 70%

Secondary (10th) - CBSE

- **Fatima Senior Secondary School, Gonda (U.P)**
- Score: 66%

Skills

Technical Skills:

- React Js , Redux
- Tailwind CSS
- Javacore programming
- Python , SQL, NodeJS
- HTML, CSS, JavaScript
- Data Structures and Algorithms
- C programming, Typescript
- Git, GitHub, Material UI
- Linux, NPM, Agile

Soft Skills:

- Problem Solving
- Adaptability
- Teamwork
- Time Management

Certifications

- **Internship on Web Development (Exposys Data Labs)**
- **C Programming course**

Work Experience (2.3+ years)

1. **Asego Group 09/2024 - 11/2024**

UI Developer : Responsibilities :-

- Worked on **Figma** design for Asego B2C Journey.
- Wrote code for Asego group Insurance digital product using **HTML**, **CSS**, **Bootstrap**.
- Worked on GIT for Code version control.

2. **Flying Devs LLP 07/2022 - 08/2024**

Software Engineer: Responsibilities :-

- Wrote code on Atom and VSCode platform using **React, Redux, HTML,CSS, JavaScript** and Fix all Bugs of frontend.
- Worked on CI/CD process for software development using GitLab and timelines to achieve goals.
- Worked with source version control tool GIT to manage the code repository.
- Collaborated on all stages of systems development lifecycle, from requirements gathering to production releases.

Projects

1. Online food ordering system

- Developed a robust Online Food ordering system using **React js and Redux.**
- **Homepage**: Homepage displaying various options such as popular restaurants, cuisine types, or special deals. This page would dynamically render restaurant cards or listings using **React components**, possibly fetching data from an API.
- **Restaurant Selection**: Users can browse through the list of restaurants, filtering by top rated restaurants Clicking on a restaurant card would lead to the restaurant's menu page.
- **Menu Display**: The menu page would showcase the restaurant's offerings, categorized by appetizers, main courses, desserts, etc. React components would render each menu item dynamically, including images, descriptions, and prices retrieved from the backend.
- **Adding to Cart**: Users can add items to their cart directly from the menu page. React components would manage the cart state, updating it as users add or remove items.
- **Checkout Process**: When users are ready to place their order, they proceed to the checkout page.
- **Order Confirmation**: After completing the checkout process, users receive an order confirmation pop up message.

2. EdTech Dashboard

- Developed a EdTech Dashboard web application using **React Js**.
- Dashboard has navigation bar and courses details. Utilized **React Router** for navigating on Dashboard. Dashboard is responsive for all screen size.
- Accessible at : https://github.com/srishti-1000/edtech_website
- Live link : https://master--smartedreactassignment.netlify.app/

3. Music Recommendation based on emotion detection

- Created a user friendly music player where user can show there emotion and it recommends a list of songs. This system is Developed using **Python**. Several Datasets has been used.
- Frontend is done using **HTML , CSS ,Javascript.**
- The system serves as a music player which recommends songs according to the user facial emotion.

4. Snake Game

- Developed a Snake Game application using **HTML, CSS, and JavaScript**, accessible at https://github.com/srishti-1000/Snake-Game.
- Programmed snake movement, food consumption, and game-ending conditions to create an interactive gaming experience.
- Utilized **HTML, CSS, and JavaScript** for a seamless and visually appealing game interface.
- Automatic generation of a high score upon completing the game adds a competitive element to enhance the overall gaming experience.
