Experience

Channel Feeder India Pvt. Ltd. (Jun 2022 - Jan 2025)
Frontend Developer Bengaluru

- Collaborated with the marketplace team to understand the challenges they faced with the current app & to identify their exact needs to improve workflow efficiency.
- Designed and developed the user interface using HTML, CSS, JS and Figma for an application used by the marketplace team.
- Designed and developed an office management system customized to meet the specific needs of the organization.
- Identified key roles within the company, such as HR, Dept Managers, Asset Managers, and Adm, & developed a system that enables seamless collaboration & efficient workflows among them.
- Key features of this application include bulk pay slip generation, ID card creation, conference room booking, user onboarding and offboarding, asset management, leave management, grievance handling, etc. Technology used - Figma & React.js

Orphic Solution (Oct 2021 - Jun 2022)
Frontend Developer Bhopal

Designed, developed and deployed multiple websites for clients using HTML, CSS, BS4, JS & WordPress. Additionally, I've also managed client's hosting to ensure optimal website performance.

Freelance (May 2020 - Oct 2021)
Web Developer Remote

As a freelancer, I have designed and developed numerous websites for clients using Figma, WordPress, HTML, CSS, & Bootstrap. Managed hosting & implemented on-page SEO strategies for enhanced online visibility.

Education

Bachelor Of Computer Applications (July 2013 - July 2016)
MCNUJC University Bhopal
