Servers	Tomcat 9.0	
Frame Works	Angular, Angular Js	
Tools	Git, maven, Jmeter, Postman, Dockers	
IDEs	Eclipse, STS	

Project Profile :

Project #1 **Feb 2021 – May 2022**

Title : Wealth Management
Database : My sql

Team Size 8
Duration : 15 months
Role : Developer

Description :

Wealth Management Application where it's from banking domain where people can Do intraday with stocks and it will give the facilities of financial supports like it can give the loans to Customers, at same time it help people, businesses and institutions build, preserve and manage

wealth so they can pursue their financial goals.

Environment : JDK 1.8spring boot 2.3, Hibernate5..x, Oracle11g Eclipse , Spring Rest, SQL developer, maven, GIT, Postman , swagger ,Html, CSS, Typescript, Angular, material UI, Bootstrap, and etc..

Responsibilities:

- Understanding the user requirement, preparing requirements specification documents for all the enhancements proposed by the application user groups.
- Used Angular framework
- Involved in code enhancement, Defect fixing

Project #2 **Jun 2022 – Jun 2023**

Title	: **Health Care Application**
Database	: PostgreSQL
Team Size	8
Server	: Tomcat
Role	: Developing & Designing

Description:

Main perspective of Health Care application is nothing but the Emergency Response officer. The purpose of using The ERO is whenever the patient/Parents has called to 108 Emergency Ambulance/102 Calling/Bike Ambulance/Hearse Calling then immediately we will take the caller number and caller name of the patient has taken and we will dispatch the Emergency case for the particular base location.
Then the case will transfer to Dispatch Closure officer (DCO), ERCP, Feedback, Supervisor. The DCO will call to Emt/Driver. Then he asks to fill the Details of the patient. And in DCO we will capture the patient details, Chief Complaints, Past History, Baseline condition, patient handover condition, Destination Hospital, Trip Details etc.
In DCO we have entered the data of the patient until he reached to hospital and handover to the patient. We will capture all Details and then we will close the case of the particular patient. In ERCP application, we will capture the advice of the doctor details. In Supervisor application, we will monitor all the details. In Feedback application, we will take the feedback of the patient, like for sample example whenever ERO has dispatched the case from ERO then in feedback application will take the feedback of the patient like if any equipment is not working in an ambulance.

Environment: JDK 1.8, spring boot 2.3, PostgreSQL, STS, Maven, Angular 12,Angular js, Jmeter, GIT, Postman (GIT-SCRUM), Bagasura, Kubernate, Putty and etc..

Responsibilities:

- Involved in gathering the requirements, analysis, design and development of the project.
- Enhancements with additional features.
- Developed many businesses functionality in services.
- Written Restful Service to expose the application to the external world.
- Involved Unit testing, Bug Fixing.
- Understanding the user requirement, preparing requirements specification documents for all the enhancements proposed by the application user groups.

Project #3

Jul 2023 – Jun 2024

Title	: **Project on Track**
Database	: My SQL
Team Size	12
Server	: Tomcat
