Summary: Having 5+ years of experience in designing user-centered digital interfaces. Skilled in user research, wireframing, prototyping, and front-end technologies. Proficient in Figma, HTML/CSS, Bootstrap and WordPress customization.

Work Experience:

WildTigers Technologies Pvt. Ltd. - **Jan 2023 - Mar 2025**

Headbase IT Solutions - **Dec 2021 - Dec 2022**

Generation Next - **Sep 2019 - Sep 2021**

Projects:

PraHeal (Clinic Management SaaS Platform):

- Designed intuitive and user-centric interfaces for PraHeal, a cloud-based Software as a Service (SaaS) solution for healthcare providers.
- Crafted visually appealing and functional UI for features like patient data management, appointment scheduling, prescription management, and patient web applications, ensuring seamless user experiences across desktop, tablet, and mobile devices.

Human Resources Management System(HRMS):

- Developed user-friendly interfaces for project management, task assignment, leave tracking, salary management, and working hours monitoring.
- Created wireframes, prototypes, and high-fidelity mockups in Figma, optimizing complex processes for improved user experience.

Hidden Wealth Sales CRM:

- Crafted visually appealing and intuitive designs for lead management, sales tracking, customer communication, and reporting tools.
- Produced wireframes, interactive prototypes, and high-fidelity mockups using Figma to refine user interactions.

Prep Gurukul:

- Designed engaging, user-centric interfaces for course management, video lectures, assessments, progress tracking, and student dashboards.
- Developed wireframes, prototypes, and mockups in Figma, enhancing navigation and interactivity for students and educators.

CastingPAX:

- Crafted wireframes, interactive prototypes, and high-fidelity mockups to define and enhance the user journey and experience.
- Created an intuitive, engaging, and user-friendly platform that allows users to browse and apply for casting opportunities, manage profiles, and view available crew roles.

Global Physio Academy:

- Designed and developed the UI for Global Physio Academy, transforming ideas into a clean, responsive interface.
- Converted the design into a fully functional ReactJS frontend, ensuring seamless user experience across devices and browsers.

Adaptive Investments:

- The Adaptive Investments web application serves as the primary interface for clients to access and manage their investment portfolios.
- It provides tools for monitoring financial accounts, setting financial goals, and tracking progress.
- Focus was on creating an intuitive and responsive experience that caters to both novice and experienced investors.

Pentaqube:

- Innovated UI/UX for a security solutions website, ensuring clear communication of services through a user-friendly design.
- User-friendly website design that effectively communicates the company's security solutions and services.

WildTigers Technologies Private Limited:

- As a UI Designer at WildTigers Technologies Private Limited, I contributed to redesign specific sections and additional screens/pages(Hire Dedicated Developers, Life At WildTigers, Internship at WildTigers) to improve the user experience and visual consistency of the WildTigers website.
