Objective

Aspiring Web Developer with a strong foundation in HTML, CSS, JavaScript, React, Java and MySQL. Passionate about designing dynamic, user friendly web applications while continuously learning new technologies. Adept at problem-solving, collaboration, and adapting to new challenges in a fast-paced development environment. Seeking an opportunity to contribute technical skills to innovative projects.

Technical Skills

Frontend: HTML, CSS, Javascript, ReactJS, jQuery
Backend: Java, MySQL
Tools : Git
Others: REST APIs, Database Management

Projects

Movie Ticket Booking System

Built a Movie Ticket Booking System using HTML, CSS, and JavaScript. Designed an I intuitive UI with interactive seat selecqtion and real-time showtime updates, enhancing the user experience with dynamic layouts and seamless navigation.

Trip Planner App

The Trip Planner App is a simple and responsive web app built with React. It allows users to add trip items as a to-do list, check them off when ready, and remove them if needed. The clean UI and interactive features make trip planning easy and efficient.

Pizza menu

The Pizza Menu Page is a static web page built using React. It showcases a variety of pizzas with names, descriptions, and prices in a clean and visually appealing layout. This project demonstrates responsive design and component-based UI structure.

Manage Notes

Built a "Manage Notes" web application using
HTML, CSS and JavaScript, allowing users to create, edit, delete, and organize notes efficiently. Designed with a clean and user-friendly interface, the application ensures seamless note management. Implemented dynamic UI updates and responsive design for an optimal user experience.

Value Added Courses

The Ultimate React Course 2025: React, Next.js, Context API, React Query, Redux, Tailwind, advanced patterns.

Field Of Interest

Web Development

Backend development

Database Management

Automation QA

Soft Skills

Problem-solving: Debugging and optimizing code for better performance.
Logical Thinking: Writing efficient algorithms and structuring scalable applications.
Team Collaboration: Working with teams using Git
