Professional Summary

Highly skilled Full-Stack Developer with more than 2 years of experience in designing and developing scalable, high-performance web applications. Expertise in JavaScript, ReactJs. Proven track record of improving system performance, delivering optimized, maintainable code, and collaborating across teams to align development with business goals. Passionate about solving complex problems, optimizing systems for real-time data, and driving user engagement.

Technical Skills

- **Languages**: Javascript, HTML, CSS
- **Tools and Technologies**: Git/GitHub, Jira, Node.js
- **Frameworks**: ReactJs, TailwindCss, SASS, Bootstrap, MaterialUi, Redux, Redux-Toolkit,
- **Cloud/Databases**: MongoDb, Firebase

Experience

Syncthreads Computing pvt ltd

Aug 2022 – Present

Full-Stack Developer

GPS-Based Minefield Digitization & Reporting

- Developed and optimized a fast-loading frontend for real-time minefield visualization, enhancing user interaction speed by 30%.
- Implemented features like geo-tagging, mine characterization, and progress tracking.
- Engineered a scalable backend with SHP file integration, reducing data retrieval times by 40% and increasing reporting accuracy by 20%.

Vehicle Navigation System & Audit Reporting

- Built a real-time navigation system using GPS data (latitude, longitude, altitude, angle, and time), improving path accuracy by 25% for routes exceeding 50 km.
- Enhanced user navigation features like re-centering and waypoint creation.
- Increased data processing speed by 20% through high-frequency communication with Socket.js, efficiently handling 5 real-time updates per second.

Enose Sensor System

- Designed intuitive UIs for sensor calibration and real-time visualization, reducing load times by 20%.
- Improved system diagnostics with faster response times for gas flow and concentration control.
- Implemented robust data storage and monitoring solutions, increasing system uptime by 15% and improving experiment reproducibility by 40%.

Radar Training Kit Development

- Led UI development for real-time radar data visualization, reducing load times by 20%.
- Optimized radar parameter adjustments, resulting in a 25% improvement in user control efficiency.
- Developed a customizable radar dashboard, boosting training efficiency by 30% and enhancing performance metric reporting by 40%.

Education

- **Masai School, Bangalore**

  Full-Stack Web Development — Aug 2021 - June 2022

- **Mahatma Gandhi Kashi University,Varanasi**

  Bachelor of Computer Application — Aug 2017 - June 2020
