Summary

Results-driven **Front-End Developer** with **1.8 years of hands-on experience** in building scalable and responsive web and mobile applications using **React.js** and **React Native**. Proven ability to design, develop, and optimize user-centric interfaces, integrate complex APIs, and contribute to maintainable codebases. Adept at collaborating with cross-functional teams to deliver high-performance, visually appealing, and accessible solutions across various platforms. Passionate about leveraging modern component-based architectures and continuously improving application performance.

Technical Skills

- **Frontend Development:** React.js, React Native, JavaScript (ES6+), HTML5, CSS3
- **Styling & UI Frameworks:** Tailwind CSS, Bootstrap, Material UI, CSS Grid
- **State Management:** Redux, Context API
- **Tools & Technologies:** Git, Figma, RESTful APIs, Axios
- **Soft Skills:** Client Collaboration, UI/UX Consistency, Cross-Browser/Platform Compatibility

Experience

Kapil Knowledge Hub Private Limited (Infoz It Solutions) **Sep 2023- present**

Front-end Developer

Projects

Client **: Kapil Groups (Bangalore)**

- **CRM Mobile App**
  - Developed a critical mobile CRM application designed to streamline sales operations and provide real-time analytics for field agents.
  - Led the development of secure authentication modules (login, password reset) using **React Native** and **Redux Toolkit**, integrating robust APIs to ensure data security and seamless user onboarding **for over field agents**.
  - Engineered a dynamic, data-driven dashboard in **React Native**, presenting daily and monthly analytics through reusable, visually appealing card and metric components, **improving insights.**
  - Designed and implemented robust Task & Meeting modules with full CRUD operations, incorporating pagination, search, and filtering for large datasets, **optimizing performance for low-bandwidth mobile environments.**
  - Established and enforced a centralized design system, defining consistent colors, typography, and reusable UI components to enhance brand consistency and maintainability across the application.
  - Improved visual consistency and user experience through the strategic use of **React Native Vector Icons** for intuitive iconography.

Client : Teks Academy

- **Student Portal (Jobs Module)**
  - Managed the development of a critical jobs module within a mobile student portal, facilitating seamless job search and application processes.
  - Developed and maintained a core job management module within a **React Native** student portal, facilitating seamless job search and application processes **for students**.
  - Implemented secure authentication and comprehensive profile management flows, including password recovery

and dynamic profile updates.
- Integrated Active Courses and Scheduled Classes modules, leveraging real-time API data and optimizing Flat List rendering for responsive mobile user experiences, **reducing data load times.**
- Enhanced user interactivity and accessibility by integrating tap-to-call, mailto, and map-based navigation features.
- Optimized data handling and rendering performance, adhering to mobile UI/UX best practices for cross-platform compatibility (Android/iOS).

Client : Kapil Groups

- **Real Estate Website (Kapil Properties)**
  - Built a customer-facing real estate platform to enhance property search and lead generation for potential buyers.
  - Developed a responsive real estate website using **React.js** and **Tailwind CSS**, deployed on AWS Amplify for high availability and scalability.
  - Integrated lead-generation forms with real-time validation and API calls, streamlining sales lead capture and management, **resulting increase in qualified leads**.
  - Enhanced customer engagement by implementing PDF download confirmations using jsPDF upon successful form submission.
  - Designed interactive vertical animation sliders and click-to-dial features, improving user engagement and mobile-friendliness.

  Integrated Tawk.to live chat support, providing real-time customer assistance and enhancing engagement

Client : Kapil Groups

- **Corporate Website (Kapil Technologies)**
  - Crafted a new corporate website to establish an online presence and showcase company services.
  - Designed and implemented a comprehensive UI/UX layout, prioritizing visual consistency and responsiveness using **React.js** and **Tailwind CSS**.
  - Developed a library of reusable **React components**, ensuring a consistent design language and accelerating development across multiple pages .
  - Implemented dynamic routing using **React Router DOM** for seamless navigation and optimized user experience across complex multi-page views.
  - Developed and integrated Career and Contact forms with backend APIs, including robust error validation and dynamic field handling.
  - Enriched user experience with embedded multimedia (videos, animations) and a well-structured footer for intuitive navigation.

Client : Kapil Groups

- **ATBT (Admin Task & Meeting Management)**
  - Developed an administrative application for efficient task and meeting management across internal teams.
  - Engineered reusable Sidebar and Footer components to ensure a consistent and adaptive interface across various devices, **reducing development time** .
  - Implemented comprehensive task and meeting management features, enabling administrators to efficiently create, assign, and track tasks and meetings for **up to concurrent users**.
  - Developed a custom administrative configuration system for dynamic form fields and dashboards, empowering non-technical users to manage input structures without developer intervention, **saving hours of development time monthly**.
  - Integrated granular permission-based controls to enhance user role management and data security.
  - Ensured a responsive, mobile-friendly interface with a strong focus on performance optimization and cross-browser compatibility.

Client : Teks Academy

- **ERP Module**
  - Designed and developed a comprehensive ERP user interface to streamline internal operations and data management.

- Designed and developed a comprehensive ERP user interface using **React.js** and **Bootstrap**, featuring responsive sidebars, top navigation, and adaptive layouts.
- Built dynamic, data-rich tables with real-time data fetching via **Axios**, supporting advanced features like pagination, search, and data previews for **distinct data sets**.
- Developed modular, reusable form inputs (text fields, dropdowns, checkboxes, date pickers) and a dynamic form builder for consistent styling and efficient data handling, **reducing form creation time**.
- Integrated **React Router** for managing complex, multi-page views and ensuring seamless, intuitive navigation.
- Prioritized UI consistency and maintainability, facilitating future scalability and updates.

Education

- **B.Sc. in Computers** – Prabhas Degree College, 2021
- **M.P.C** – Siddhartha Mahila Kalasala, 2018
- **S.S.C** – Lahari Vidya Mandhir, 2016

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge and I bear the responsibility for the correctness of the above-mentioned.
