Education

Indian Institute Of Technology-Hyderabad **2020 – 2024**

Bachelor Of Technology In Materials Science and Metallurgical Engineering – 7.42 CGPA

Experience

Tescra Software Pvt. Ltd. **Oct 2024 - Present**

Software Engineer *Remote*

- Built and scaled an **AI-driven recruitment platform** with **automated job postings, assessments, and AI-powered interview rounds**, boosting selection accuracy by 10% and hiring efficiency by 20%.
- **Automated the entire recruitment lifecycle**, from job creation to candidate progress tracking, reducing manual intervention across all stages.
- Developed **subscription dashboards with Stripe and Razorpay integration**, improving subscription management by 30% and tightening access control.
- Implemented **plan management features allowing users to view, upgrade, or downgrade subscriptions**, enhancing overall user experience.
- Migrated frontend build from **Webpack to Vite** and adopted **PNPM**, reducing build time by 35% and disk usage by 50%.
- Introduced Test-Driven Development with **Jest**, cutting production issues by 50% and improving code reliability.
- Migrated from React to **Preact**, created a **reusable component library**, unified the design system, and helped scale the product from **MVC** to a production-ready version.

StoryLinez **Sept 2024 - Dec 2024**

FullStack Developer - Freelancing *Remote*

- **Designed 200+ ad templates** and product **wireframes** in Figma, focusing on visual consistency and user-friendly design.
- Developed the **frontend** from scratch using **React.js** and **Tailwind CSS**, implementing responsive UI, routing, and pagination for smooth navigation.
- **Rendered dynamic JSX components** by fetching backend data, enabling real-time updates and interactive features.
- Built modular components using **React hooks**, improving code efficiency, and collaborated on GitHub for version control.
- Worked on **diffusion models** to enhance personalized ad generation through machine learning.
- Worked on fullstack implementation for different components of the website.
- **Designed backend architecture** and supported its implementation, ensuring scalability and performance.

Aviac Technologies Pvt. Ltd. **June 2023 – August 2023**

Web Developer Intern *Remote*

- Developed two immersive 3D websites using **React Three Fiber, React Three Drei, and Lamina, integrating .glb models** via gltfjsx and implementing scroll-based animations with **GSAP** and React hooks like **useLayoutEffect** and **useRef**.
- Implemented interactive model behavior using **OrbitControls and getAzimuthalAngle** to trigger JSX content based on camera angle during horizontal drag, leveraging **useFrame, useState**, and dynamic angle detection to enhance user engagement.

Skills

Programming Languages: C/C++, HTML, CSS, SCSS, JavaScript, TypeScript, EJS.
Libraries & Frameworks: ThreeJS, ReactJS, Preact, Bootstrap, TailwindCSS, ExpressJS, mongoose, React Three Fiber, Framer Motion, Material UI, React-redux, Jest.
Softwares & Others: NodeJS, MongoDB, Git, Unix Command Line, Azure.
CS Domain: Object-Oriented Programming, Database Management Systems, Operating Systems, Data Structures & Algorithm, Computer Networks.
Soft Skills: Leadership, Critical Thinking, Communication Skills, Agile Development.

Projects

3D Portfolio — Link: portfolio-dia8.onrender.com

- Developed a 3D portfolio using **ThreeJS** and **React Three Fiber** for 3D graphics in React.
- Made the code reusable and scalable using **Higher Order Components (HOCs)**.
- Styled the portfolio with **TailwindCSS** and implemented animations using **Framer Motion**.
- Enabled email functionality through a form and ensured responsiveness across all devices.
- Improved site performance using **Suspense** and **Preload**.

Forkify (JavaScript) — Link: forkify-jscript.netlify.app

- Developed the project using **MVC Architecture** and applied the **Publisher-Subscriber** pattern for event handling.
- Implemented **Pagination** for search results and added **Bookmarks** stored in **localStorage**.
- Created a DOM updating algorithm that updates specific DOM elements instead of re-rendering the entire page.
- Included error and success message handling for improved user experience.

Official IR Cell Website — Link: ir-cell.netlify.app

- Built the official **International Relations Cell** website of IITH from scratch using **ReactJS** and **React Hooks**.
- Added animations with **Animate On Scroll (AOS)** to enhance user engagement.
- Initiated the project to revamp the currently running website, which is still under development.
