Surat, India

Professional Summary

Angular developer with **3+ years of experience** in Angular, .NET, Node.js, and SQL/NoSQL databases. Skilled in building scalable applications including **real-time video conferencing, GIS mapping, and enterprise web apps**. Proven ability to deliver on-time solutions, optimize performance, and collaborate effectively with cross-functional teams.

Technical Skills

Frontend: Angular, HTML5, CSS3, TypeScript
Backend: Node.js, ASP.NET, .NET MVC (C#), Windows Services
Databases: SQL Server, MySQL, PostgreSQL, MongoDB
Cloud & Tools: AWS S3, Git, Postman, NVM, TFS

Work Experience

Software Developer
Web Ashlar Software Solution Pvt. Ltd. – Surat

Jul 2022 – Aug 2025

- Worked on multiple enterprise-level projects, delivering web applications using Angular, .NET, Node.js, and SQL databases.
- Contributed to system performance optimization and collaborated with cross-functional teams to meet client requirements.
- Developed reusable components and APIs ensuring scalability and maintainability across projects.

Intern – Software Development
Blue Dwarf Technology Pvt. Ltd. – Ahmedabad

Sep 2021 – Jun 2022

- Assisted in development of enterprise web applications using .NET and Angular.
- Optimized SQL queries, improving performance of backend operations by 15%.
- Supported the full software development lifecycle from design to deployment.

Projects

MapSearch – Envision Maps (GIS Web Application)

Technologies: Angular 5, .NET MVC (C#), ASP.NET (.NET Framework 4), Node.js, GeoServer, PostgreSQL, ArcGIS, SQL Server, IIS

- Developed an interactive GIS platform for geospatial data visualization and analysis.
- Integrated GeoServer for spatial layers, shape file/KML/.xls/.csv uploads, and custom styling.
- Implemented secure APIs and spatial queries using PostGIS and SQL Server.
- Enhanced system usability for 500+ daily active users.

Live Kit Video Call Application

Technologies: Node.js, Typescript, Angular, LiveKit SDK, PostgreSQL, AWS S3

- Built real-time video/audio conferencing supporting 200+ concurrent users.
- Implemented authentication, recording, playback, and AWS S3 integration for media storage.

Sygic Service

Technologies: C#, Windows Service, Task Scheduler, JSON, KML

- Automated conversion of .kml files to .json format with scheduled execution.
- Reduced manual processing by 70% and enabled instant browser-based visualization.

3D Mapping

Technologies: Esri ArcGIS Online, JavaScript, Esri JS API

- Developed interactive 3D maps with custom layers, routing widget, and animated playback.
- Integrated editor widget for placement, scaling, and adjustments, improving UX.

Education

2016 – 2019	**Bachelor of Computer Application (B.C.A)** Shri Shambhubhai V. Patel College
2019 – 2021	**Master of Computer Application (M.C.A)** LJ Institutes of Computer Applications
