PROFILE

Hi, I'm Juhi Arode, an **UI/UX designer** with a **BCA from City Premier College**, motivated by a passion in the design of ecosystem of digital interfaces. It all started with **a passion for video and photo editing** and slowly transformed into **building complex interactions systems** and solving real life problems through designing. I excel at **user research**, **wireframing**, and **creating captivating interactions** that deliver functional and aesthetically pleasing solutions. My attention to detail allows me to concentrate on the product's human side, blending technology with creativity and usability, to enhance design impact.

EXPERIENCE

UI/UX Intern at DesignMacha LLP, Bangalore (Jan 2024 - Jun 2024)

UI/UX Designer at DesignMacha LLP, Bangalore (Jun 2024 - Present)

- **FashnIQ – Wardrobe Management**

An innovative solution aimed to optimize sustainability and accessibility in fashion – a digital wardrobe management platform. With this platform, users can organize their wardrobe, get AI-driven outfit recommendations, buy or sell second-hand clothes, and shop for fashion items. It offers a sophisticated yet simple User Experience (UX)/User Interface (UI) approaches that encourages ease of interaction, enhancing conscious engagement with fashion alongside effortless navigation and user satisfaction. Other platform highlights are a fashion-centric community, secure renting/reselling options, and personalized styling powered by advanced algorithms offered through a smooth interface.

- **Medical Appointment Booking Interface**

MedCure is a mobile-first healthcare application engineered to facilitate connections between patients and medical professionals, and to provide seamless access to a comprehensive suite of medical services. This application seeks to modernize and streamline the healthcare experience by addressing prevalent challenges, including difficulties in identifying appropriate medical specialists, cumbersome appointment scheduling procedures, and a lack of transparency in healthcare costs. MedCure furnishes a user-centric platform that simplifies the processes of doctor discovery, appointment scheduling, and payment, thereby empowering patients to assume greater control over their healthcare management and to proactively manage their well-being.

- **Solar Panel Installation App**

Developed an application for tablets and smartphones that simplifies the installation of solar panels for users. The application walks them through the evaluation, choice, and final steps of installation while giving accurate estimates of the expenses and available government grants. It includes AI-based analysis of the home's suitability, model comparison, and installation progress tracking. Like with all other products, the onboarding experience is smooth with in-app information about the advantages of renewable energy.
