Targeting to leverage expertise in Front-end Development and Data Analytics to build innovative solutions that enhance user experiences and enable data-driven decision-making in a dynamic organization, while contributing to organizational growth and expanding professional skills.

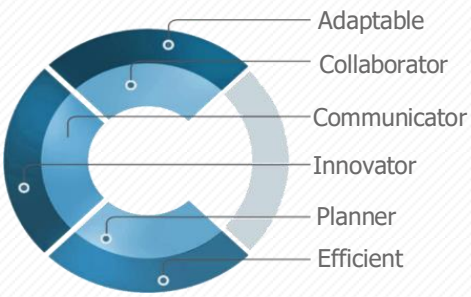
PROFILE SUMMARY

- Solution-driven technocrat with **nearly 3 years of experience** in designing & developing scalable, user-friendly, & data-driven applications.
- Last worked as a **Software Developer at Nagarro**, combining **Software Development** and **Business Intelligence** skills to create impactful data-driven solutions; committed to leveraging analytical expertise and technical proficiency to drive growth and innovation in Power BI and Data Analyst roles.
- Spearheaded migration & optimization of **UI components** at Nagarro, improving front-end performance & enhancing customer experience.
- Showcased expertise in **data cleaning, ETL processes**, and **Front-End & Back-End integration**, supported by practical experience in **SQL, Angular**, and **web technologies**, enabling seamless data flow and optimized system performance.
- Proven capability to **collaborate cross-functionally** and **apply optimization techniques**, resulting in improved application responsiveness, user engagement, and measurable business outcomes.
- Proficient in **Power BI** and **Data Visualization**, with hands-on experience in developing comprehensive reports and dashboards using **Power Query, DAX**, and **Advanced Excel** to drive actionable business insights across projects such as customer churn, call center performance, and workforce diversity.
- Strong analytical and client-facing skills, skilled at gathering and interpreting complex project requirements by engaging directly with clients and stakeholders to deliver tailored BI solutions that **enhance operational efficiency and customer satisfaction**.

CORE COMPETENCIES

- Business Intelligence
- Data Visualization
- Data Analysis & Interpretation
- API Implementation
- Dashboard Designing
- Statistical Analysis
- Data Cleaning & Preparation
- Frontend Application
- Unit Testing

SOFT SKILLS



EDUCATION

Bachelor of Engineering in Computer Science from Pranveer Singh Institute of Technology and Science in 2021

TECHNICAL SKILLS

- **Data Analysis & Business Intelligence**: Power BI Desktop, Power BI Service, Advanced Excel
- **Databases & Query Languages**: SQL Server, MySQL, SQL
- **Front-end Development**: Angular, JavaScript, TypeScript, HTML/CSS
- **Version Control**: GitHub
- **Design & Prototyping Tools**: Balsamiq Wireframe
- **MS Office Suite**: Word, Excel, PowerPoint

CERTIFICATIONS & WORKSHOP

- Basic to Advanced Microsoft Power BI – by Microsoft Certified Trainer
- Basic to Advanced Structured Query
- Basic to Advanced Microsoft Excel by Skill Nation
- Advanced Data Science using Python
- Completing 2-day workshop on Business Intelligence by Power BI

WORK EXPERIENCE

Nagarro, Gurugram, Apr'21-Dec'23

Growth Path:
Software Developer, Nov'21-Dec'23
Trainee, Apr'21-Oct'21

Highlights:

- Spearheaded the collaboration with design and performance teams to conceptualize and implement new features for Front-end applications, ensuring seamless integration with existing systems, resulting in a **20%** improvement in feature delivery time.
- Undertook the responsibility of migrating user interface designs while integrating Back-end services, employing optimization techniques to enhance Front-end performance, achieving a **45%** reduction in page load time.
- Engaged directly with clients to gather and analyze project requirements, translating them into actionable development tasks that align with business objectives, which contributed to an increase in client satisfaction.
- Transformed design wireframes into high-quality, responsive code utilizing HTML, CSS, Bootstrap, and JavaScript, ensuring adherence to best practices in web development and improving cross-device compatibility by **30%.**
- Actively participated in the creative design and development of web applications, contributing to the overall user experience and interface design, leading to boost in user engagement.

PERSONAL PROJECTS

Power BI Developer | PwC (Virtual Internship - Forage)

- Developed a Call Center performance analysis report utilizing KPIs, delivering an average customer satisfaction rating of **3.4/5** to identify operational trends.
- Designed a Churn Analysis report for **7,043 customers**, calculating a churn rate **of 26.54%** through advanced DAX functions and visualizations to support strategic decision-making.
- Created a Diversity & Inclusion dashboard to analyze workforce composition based on gender data **for 500 employees**, promoting organizational equity insights.

Bank Report Analysis | Power BI

- Analyzed customer datasets (**4,014 records**) across multiple regions, segmenting by job classification and financial metrics.
- Developed comprehensive Power BI reports using Power Query, DAX, and various chart types to visualize global customer distribution and balance trends.

Car Data Submission Analysis | SQL, Angular, HTML, CSS

- Engineered a web application enabling clients to submit and track new car materials, integrating Front-end optimization, API services, and cascading style sheets for an enhanced user experience.
- Utilized data analytics to optimize cart entry updates, identify high-traffic routes, and improve booking efficiency, leading to increased revenue and reduced customer complaints.

Movie Database Analysis | MS Excel

- Created an interactive dashboard analyzing gross revenue by movie genre and language using pivot tables, clustered column charts, and Excel's data analysis tools.
- Highlighted top-rated movies with clear visualizations to support data-driven insights.

PERSONAL DETAILS

Date of Birth: 7th March 2000
Languages Known: English & Hindi
Address: Basti, Uttar Pradesh, 272001
