Creative and detail-oriented UI/UX designer with hands-on experience in **website design**, **application design**, and **video animation**. Completed 6 months of intensive UI/UX training focused on projects. Passionate about creating intuitive, user-centric digital experiences and eager to contribute to a dynamic design team.

Experience

Comtranse Technology — **July -2025**
UI/UX Designer — Kolhpaur

Medical Clinic Portal
Created a user-friendly appointment booking flow allowing patients to easily select doctors, view available slots, and confirm appointments with minimal steps.

Designed clear and engaging service pages highlighting various medical specialties, treatment options, and pricing, enhancing service discoverability.

Used Figma Sketch for high-fidelity prototypes and collaborated with developers to ensure pixel-perfect implementation.

Focused on responsive design, ensuring seamless experience across mobile, tablet, and desktop devices.

Projects

Event Management Platform UI/UX Design

Project Overview:

Designed a user-friendly web and mobile interface for an Event Management System that allows users to browse, book, and manage events such as weddings, Engagement, Birthday party.

Responsibilities:

- User Research:

  Conducted basic research through surveys and competitor analysis to understand user needs and pain points related to event booking platforms.
- UI Design:

  Designed clean and responsive interfaces using modern UI principles. Used color theory and typography to ensure visual clarity and engagement.
- Accessibility & Responsiveness:

  Focused on making the design accessible (contrast, font sizes) and responsive for mobile, tablet, and desktop views.
- Animation:

  Created simple UI animations (button hover, loading states, page transitions) using Canva and Lottie for better user engagement.
