Surat, Gujarat, India
Actively seeking opportunities in Pan-India

Frontend Developer with **2.6+ years of specialized experience** in building **cross-platform mobile and web applications** using **Ionic Framework and Angular**. Expert in creating **responsive, high-performance hybrid applications** for iOS and Android platforms. Proven track record in developing **scalable enterprise solutions** across energy management, company portal, and digital services industries. Skilled in **component-based architecture**, state management, and **mobile-first design principles**. Strong focus on delivering **pixel-perfect UIs** with seamless user experiences and optimal performance across all devices.

SKILLS

- **Frontend Development:** Angular, Ionic Framework, Capacitor, Cordova, TypeScript, JavaScript, HTML, CSS, SCSS.
- **Mobile App Development:** iOS & Android Apps, Native Plugins (Camera, Geolocation, Push Notifications etc), App Store & Play Console Deployment.
- **UI & Styling:** Tailwind CSS, Bootstrap, Material Design, Ionic Components
- **State & APIs:** RxJS, Angular Services, RESTful APIs, WebSockets, Firebase Integration
- **DevOps & Tools:** Docker, Kubernetes, Cypress, Git/GitHub, Agile Methodologies.
- **AI Tools:** ChatGPT, Claude AI, Cursor, Windsurf, Antigravity

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science
Rajiv Gandhi Technological University, Madhya Pradesh | Graduated 06/2023

EXPERIENCE

Frontend Developer | Code Alchemy Pvt Ltd
September 2023 - Present | Katargam, Surat, Gujarat, India

PROJECT EXPERIENCE

1. Company Portal (Employee & Task Management System)

- **Technologies:** Ionic Framework, Angular, Capacitor, TypeScript, SCSS
- **Features implemented:**
  - **Employee Management:** Developed features for **leave management, swipe-in/swipe-out tracking, and project & invoice management**.
  - **Task Management:** Implemented a **task tracking system** with **auto start & end timer functionality**, similar to **Trello and Jira**.

    - **Real-Time Updates**: Utilized **WebSockets** for **real-time task updates and chat functionality** to enhance team collaboration.
    - **Time Tracking**: Designed a **timer list for all employees**, allowing better productivity monitoring and reporting.
    - **Project & Invoice Management:** End-to-end tracking of project lifecycle and financials.
    - **Employee Timer List:** Tracks active and past tasks for all employees.
    - **Holiday Module:** Manages company-wide holidays and individual leave requests.
- Optimized performance for large datasets and concurrent user activity.

2. Appointify - Appointment Booking Web Application

- **Technologies**: **Angular, Ionic, TypeScript, Firebase, WebSockets**
- **Real-Time Appointment Scheduling**: Designed a booking system with **real-time availability tracking**, allowing clients to seamlessly schedule appointments.
- **Customizable Availability**: Vendors can **set their own availability and manage slots**, providing full control over bookings.
- **Automated Reminders & Notifications**: Implemented **email confirmations and reminders** to ensure a smooth scheduling experience.
- **Flexible Payments**: Integrated **Razorpay** for secure **online and in-person payments** to streamline transactions.
- **Branded Scheduling Page**: Developed a **user-friendly booking interface** where vendors can showcase their services, availability, and manage client appointments efficiently.

3. TBS ePrintiT - Web-to-Print Library System:

- **Technologies: Angular, Ionic, Microsoft Intune, TypeScript**
- Developed **secure, cloud-based web-print solution** enabling users to print documents, emails, web content, and Google Drive files from any device to library printers.
- Created **modern Angular-based UI** with Material Design principles supporting seamless experience across desktops, tablets, and smartphones.
- Implemented **responsive file upload** with drag-and-drop.
- Built **custom Angular plugins** for web page screenshot capture, PDF preview, document manipulation, and print job configuration.
- Built **print credit system** with balance tracking and payment integration for library services.
